

Reviews & Support Component

1. Overview

The **Reviews & Support component** allows students to provide feedback on teachers and raise concerns through a support ticket system.

Students who complete lessons can leave **ratings and written reviews** about their learning experience with a teacher. These reviews contribute to an **average rating score** displayed on the teacher's profile, helping other students evaluate the quality of teaching before booking lessons.

In addition to reviews, the module also provides a **support ticket system** where students can submit concerns or questions. These tickets can be directed either to a **specific teacher** or to the **platform administrator**, allowing issues related to lessons, bookings, or platform usage to be resolved efficiently.

System Features

2.1 Review System

Leave a Review

After completing a lesson, students can leave a review for the teacher that includes:

- **Star rating (1–5 stars)**
- **Optional comment describing their experience**

The review reflects the student's satisfaction with the teacher's teaching quality, communication, and overall lesson experience.

Review Aggregation

All ratings submitted by students are aggregated to generate an **average star rating** for each teacher.

Example display:

★ **4.6 (28 reviews)**

This rating appears prominently on the teacher's profile page and is updated automatically whenever a new review is added.

Review Section on Teacher Profile

Each teacher profile includes a **dedicated review section** where students can:

- Read feedback from previous students
- View star ratings and comments
- Understand the teacher's teaching quality and reliability

Reviews are typically displayed in a **chronological list**, with the newest reviews appearing first.

Example:

What our customers say

All Reviews 4.6  Google 4.7  Facebook 4.9  Tripadvisor 4.5  Amazon 4.6

Verified customer

I ordered a product from their website, and it took over a month for it to arrive. When I contacted customer service for assistance tracking my order, they were very rude and not helpful. Once I finally received my order, some items were missing, and I received the wrong sizes. Won't be ordering from here again.

2.2 Support Ticket System

The support system allows students to submit requests for assistance through a **ticketing interface available in the dashboard**.

Submit Support Ticket

Students can create a support ticket by filling out a form that includes:

- **Ticket subject**
- **Description of the issue**
- **Recipient selection**
 - Teacher
 - Admin

Ticket Categories

Tickets may address issues such as:

- Problems with bookings or lessons
- Concerns about a teacher
- Platform or technical issues
- General questions

Ticket Handling

Once submitted:

- Teachers can view tickets directed to them and respond accordingly.
- Admins can manage platform-related concerns or disputes.
- Tickets remain recorded in the system for reference and resolution tracking.

Functional Requirements

The Reviews & Support component must support the following functions:

Review System

- Students can **submit reviews and ratings (1–5 stars)** for teachers.
- Students can **add a comment describing their learning experience**.
- The system calculates and displays the **average rating for each teacher**.
- Teacher profiles display **all reviews left by students**.
- The total number of reviews is shown alongside the average rating.

Support Ticket System

- Students can **create support tickets** through their dashboard.
- Students can **direct tickets to either a teacher or an administrator**.
- Teachers and admins can **view and respond to support tickets**.
- Tickets remain stored for tracking and reference.
